We typically think of the sun as a distant yellow orb that’s not directly involved in our lives (unless you count sunburns). But the fact is, it can play a big, beneficial role for us, if we just look at that fiery ball in a fresh new way: As a helpful, hard-working fellow who has plenty of energy, is always able to lend a hand around the house — and can help out our entire community in the process! Meet our Choose Renewable family. Energy from solar, wind and biogas resources, ready to go to work for you, starting at only $3 a month!

**How this works:**

Our Choose Renewable family is available in $3 blocks. Every block you buy is added to your monthly electric bill, and ensures that a share of your electricity comes from solar, wind and biogas. By putting renewable energy to work, you’re helping to control energy costs, keeping the environment clean and making the whole community a better place. ALL FOR THE COST OF A GALLON OF MILK.

**Why Choose Renewable?**

- **IT’S CLEAN**
  The more renewable energy we use, the less coal, oil and natural gas we have to burn.

- **IT’S SMART**
  Renewable energy efficiently uses valuable resources and prevents waste.

- **IT’S LOCAL**
  Our renewable resources are homegrown: Solar from WI, MI and IA; wind from Dodge County, WI; biogas from Little Chute, WI.

- **IT’S SUSTAINABLE**
  Solar, wind and biogas energy sources will never run out!
I agree to purchase: ______ blocks of renewable energy at $3.00 per month, for a total monthly commitment of $_______. This purchase will appear as an additional charge on my monthly utility bill. I understand I can change my participation level or cancel at any time.

At New Holstein Utilities, we join forces with other local, not-for-profit utilities through WPPI Energy to share resources and lower costs.
